Delete Edit **Create cost category**

Name에 원하시는 이름을 입력하고 Next를 클릭합니다.

AWS Billing > Cost Categories > Create cost category

Step 1

Name cost category

Step 2

Define category rules

Step 3 - optional

Define split charge rules

Name cost category Info

Define the name for your new cost category. The cost category name will appear as a new column in your AWS Cost and Usage Report, and the rows of your billing line items are assigned to the corresponding cost category value. Your cost category name will also appear as a filter in AWS Cost Explorer, AWS Budgets, and AWS Cost Anomaly Detection.

Cost category details

Name

Your unique cost category name. The name can't be changed after the cost category is created.

CkStackProd

A unique name is required. The name must be between 1 - 50 characters.

Resource tags - optional

You can use resource tags to control access to this cost category with IAM policies.

You don't have any resource tags attached to your cost category.

Add new resource tag

You can add 50 more resource tags.

Cancel **Next**

AWS Billing > Cost Categories > Create cost category

Step 1

Name cost category

Step 2

Define category rules

Step 3 - optional

Define split charge rules

Define split charges - optional

▼ How split charges work

What is a split charge?

A split charge is a set of shared costs that you can allocate across multiple cost category values. After defining a split charge, you can access your total cost allocations on the cost category details page. From there, you can download a CSV allocation report.
Note: Split charges are available only through AWS Cost Categories. This feature is not shown in other cost management features (for example, Cost Explorer and Cost and Usage Reports).

Example of a split charge

Your organization might have a set of costs shared by multiple teams, business units, and financial owners. These shared costs can include data transfer costs, AWS Support charges, and operating costs.

Source value

Choose the cost category value that you want to split.

Uncategorized

Associated cost: \$0.94

Target value

Choose one or more target cost category values to allocate the source cost category value to.

Choose target values

Atbio X

Ilscience1 X

Paseco1 X

Charge allocation method [Info](#)

Choose how to allocate your costs across the targeted values.

☐ Proportional

Allocate your costs using proportionally weighted target value costs.

☐ Fixed

Allocate your costs by defining a percentage for each of your target values.

☒ Even split

Allocate your costs evenly across your target values.

Charge allocation - Even split

Use the table to see how your costs are evenly split across your target values. Associated costs are rounded to the nearest hundredth decimal place (\$0.00).

Target value	Percentage	Associated cost
Atbio	33.33%	\$0.31
Ilscience1	33.33%	\$0.31
Paseco1	33.33%	\$0.31
Total	100.00%	\$0.94

Cost categories가 만들어진 후 이렇게 서비스별 비용 조화가 가능합니다.
